SUMMARY

Results-driven Product Manager and Business Analyst with 3+ years of experience in leveraging data analytics, AI tools, and cloud solutions to drive product innovation and enhance operational efficiency across SaaS, fintech, and transportation industries. Skilled in cross-functional collaboration, user-centric design, and data-backed decision-making to deliver impactful products.

WORK EXPERIENCE

Lead Business Analyst (Product Manager) - CyBIZ Lab, USA

Aug 2024 - Present

- Defined **product vision and roadmap** for transit optimization tools, leveraging **data-backed strategies** and **machine learning insights** to reduce commute times by 20%, improving customer satisfaction and operational efficiency.
- Led **15+ user and stakeholder interviews**, uncovering pain points and prioritizing user-centric features, which drove a 25% increase in adoption, enhancing user engagement and the tool's market fit.
- Developed a **real-time Incident Management Dashboard** in **Power BI**, integrating streaming data to reduce emergency response times by 80%, ensuring service continuity, and improving decision-making for operational teams.
- Monitored **10+ KPIs** to track product performance, enabling iterative improvements that led to a 15% reduction in commuter delays through **data-driven iterative product enhancements** and optimization.
- Translated **transportation data into actionable insights**, guiding the product team on feature enhancements, roadmap priorities, and planning, ensuring city-wide transit improvements and greater system efficiency.

Business Analyst Intern - Able Up Iowa, USA

Jun 2024 - Aug 2024

- Processed **100K+ demographic records** using **Python (Pandas, Matplotlib)** to extract deep insights into insurer trends and user behaviors, enabling more precise business decision-making across multiple departments.
- Built **serverless ETL pipelines** in **Azure Data Factory**, reducing data processing time by 50%, enhancing workflow efficiency and streamlining the transfer of data across various business intelligence platforms.
- Designed **Power BI reports** with 15+ critical KPIs, enabling stakeholders to make **data-driven decisions** faster and more accurately, improving overall operational efficiency across business units and leadership teams.
- Developed **scalable Azure-based workflows**, ensuring seamless **cloud data integration** and real-time data availability across analytics platforms and internal business systems for enhanced reporting and decision-making.
- Presented key findings to **cross-functional teams**, aligning data insights with goals, and improving decision-making and execution.

Associate Software Engineer - Accenture, India

Oct 2021 - Jul 2023

- Automated 100% of **data ingestion tasks** using **SQL procedures**, saving over 200+ manual hours/month, which increased productivity by 90% across teams and optimized the overall business data pipeline efficiency.
- Collaborated with **product owners** to enhance **Blue Yonder SaaS backlog features**, reducing incident tickets by 20% and improving release velocity, enabling faster product deployment and smoother updates.
- Developed **CI/CD pipelines** using **Azure DevOps, GitHub, and Oracle Cloud**, improving release efficiency by 40%, accelerating product updates and automating deployment processes for continuous integration and delivery.
- Resolved **40+ SaaS production issues** using **custom PL/SQL queries**, improving demand forecasting, enhancing system stability by 20%, and ensuring minimal disruptions to production systems and customer experience.
- Mentored **4+ engineers**, receiving the **Skillful Award** for reducing knowledge gaps and incident backlogs by 40% through effective mentorship, proactive guidance, and collaborative teamwork.

Data Analyst Intern - WNS Global Service, India

Jan 2021 - Jun 2021

- Assisted in **designing and maintaining ETL pipelines**, optimizing recurring report processes, and reducing data lag by 30%, improving dashboard refresh efficiency and data availability across key teams and stakeholders.
- Handled **20+ ad-hoc analysis requests** weekly, delivering quick-turnaround insights that helped enable faster decision-making and improve strategic business decisions across multiple departments and leadership teams.
- Developed **visualizations and reports** using **Excel and Tableau**, helping leadership teams better interpret data and gain real-time insights into market shifts and performance metrics for strategic decision-making.
- Identified **emerging market trends** through thorough data analysis, offering actionable recommendations that supported **client engagement strategies**, leading to improved market positioning and business growth.

EDUCATION

Iowa State University - Master of Business Administration (STEM MBA)

Iowa State University - Master of Science in Information Systems (STEM)

Pragati Engineering College - Bachelor of Technology, Computer Science

SKILLS

Technical Skills:	: Python, SQL, R, ETL, Excel, Big Data, Machine Learning, Data Visualization & Analytics, APIs
Product Management	: Product Lifecycle Management (PLM), Product Vision & Roadmapping, Agile & Scrum, Product Discovery, Backlog grooming, Feature Prioritization, User Stories, A/B Testing, Cross Functional Team Leadership, Go-to-Market Strategy, Stakeholder Alignment
Tools & Platforms	: Jira, Figma, Trello, Confluence, Productboard, Miro, Power BI, MS Office Suite (Excel, Word, Power Point)
Cloud Technologies	: Snowflake, Microsoft Azure (Data Factory, Data Bricks, Fabric, Synapse), Informatica, CI/CD Automation, Amplitude, Google Analytics, Oracle Cloud
