

Sai Jeshwanth Goud Iluri

Product Manager

saijeshwanth@jobemails.net | (515) 357-3267 | USA | [LinkedIn](#) | [Portfolio](#)

Summary

Experienced Product Manager with 3+ years of expertise in driving product strategy across B2B SaaS, Consumer Apps, and Enterprise Applications. Proven ability to lead cross-functional teams and deliver customer-centric, scalable solutions. Proficient in agile methodologies, user research, and feature prioritization aligned with business goals. Skilled in collaborating with design, engineering, and stakeholders to enhance product usability and performance. Hands-on with tools like JIRA, Aha, Figma, and data analytics platforms to inform decisions and optimize outcomes. Passionate about continuous improvement and driving measurable business value.

Technical Skills

- Product & Project Management: JIRA, Trello, Confluence, Aha, Productboard, Miro, Agile/Scrum, Product Roadmapping, Backlog Grooming, Go-to-Market Strategy, PLM, MVP Definition, Product Discovery, User Stories & Acceptance Criteria, Roadmap Planning
- Programming & Data Analysis: Python, SQL, R, Excel, Big Data, ETL, Machine Learning
- Data Visualization & Analytics: Power BI, Google Analytics, Mixpanel, Amplitude, Optimizely (A/B Testing), Data Storytelling
- Design & Prototyping: Figma, Sketch, Wireframing, Prototyping, User Journey Mapping
- Collaboration & Communication: Stakeholder Management, Cross-Functional Team Leadership, User Acceptance Testing, Microsoft Office Suite (Word, Excel, PowerPoint)

Professional Experience

- Product Manager**, Discover Financial Services 08/2024 – Present | Remote, USA
- Defined and prioritized budgeting, transaction tracking, credit monitoring, and payment reminder features via user research and competitor analysis. Formed detailed user stories and acceptance criteria in JIRA, easing sprint planning with cross-functional teams.
 - Partnered with UX/UI designers using Figma and Sketch to develop intuitive, mobile-friendly interfaces. Created journey maps, prototypes, and documented workflows in Confluence to gain stakeholder approvals and maintain transparency.
 - Integrated third-party financial data providers like Plaid and Experian to consolidate user finances and credit data. Ensured secure API connections and scalable AWS backend infrastructure with encrypted data pipelines for data protection.
 - Directed A/B testing campaigns with Optimizely and Google Analytics, optimizing onboarding flows and engagement. Increased onboarding completion rates by 18% and weekly active users by 22% through iterative feature improvements.
 - Worked on the expansion of Discover's mobile app by adding credit card management, personal loans, and savings integration. Collaborated with business, design, engineering, and compliance teams to define scope, prioritize features, and align on delivery goals.
 - Directed user acceptance testing with QA and business teams, logging issues in JIRA for resolution. Developed product roadmaps in Aha, tracking progress with dashboards aligned to quarterly milestones and strategic objectives.

- Business Analyst Intern**, Able Up Iowa 06/2024 – 08/2024 | USA
- Analyzed 200K+ historical loan-repayment records using SQL and Python/Pandas, uncovering insurer-behavior insights that increased approval rates for low-income applicants by 12%, expanding access to flexible credit across the state.
 - Enhanced hourly data ingestion stream using serverless ETL pipelines in Azure Data Factory, cutting data processing time by 50%.
 - Developed a dynamic Power BI "Impact Dashboard" to monitor active vs. paid-off loans, county-level penetration, and interest savings—instrumental in securing a \$300K CDFI award for program expansion.

- Associate Product Manager**, Accenture 10/2021 – 07/2023 | India
- Directed product strategy and delivery for the Supply Chain Optimization Platform, aligning cross-functional teams on goals and improving demand forecasting accuracy by 20% through continuous iteration and customer-centric feature development.
 - Facilitated comprehensive requirement gathering from business users, SMEs, and external stakeholders, translating insights into clear product specs and user stories that improved cross-team clarity and reduced rework by 30%.
 - Owned and prioritized the product backlog in Jira, refining features based on stakeholder feedback and data insights; ensured alignment across engineering, QA, and business leads to meet evolving client priorities.
 - Conducted user research, created wireframes with design teams, and collaborated on MVP definition, enabling faster validation cycles and increasing user satisfaction with new planning workflows by 25%.
 - Delivered weekly product reviews and KPI reports to leadership, providing visibility into roadmap progress, release outcomes, and customer impact; contributed to a 35% reduction in issue escalations over three quarters.
 - Mentored team members across QA and BA roles, facilitating agile best practices, improving team velocity by 40%, and earning the "Skillful Award" for driving delivery excellence and cross-functional alignment.
